F⁰/A⁰RMING COMMUNITY

F⁰/A⁰RMING COMMUNITY

COMING TOGETHER TO MAKE A SUSTAINABLE AND
LUXURIOUS LIVING IN THE MOST ETHICAL OF WAYS.

WHY COMMUNITY FARMING

Agri Tourism

To exhibit luxury amid nature and to sing the saga of how an average terrain can be converted into a thriving food bank. To the farm owners along with revenue, it also provides some of the best corporate workspaces to work-from-farm.

Ayur wellness & senior care

Apart from rejuvenation and recreation, the true purpose of our wellness centers is to host doctors and facilities that are meant to be a 24x7 nursing station and one click emergency care. With caregivers and community all around, krushika is a paradise for people of all generations to be able to live independently and with dignity.

Grow your own food

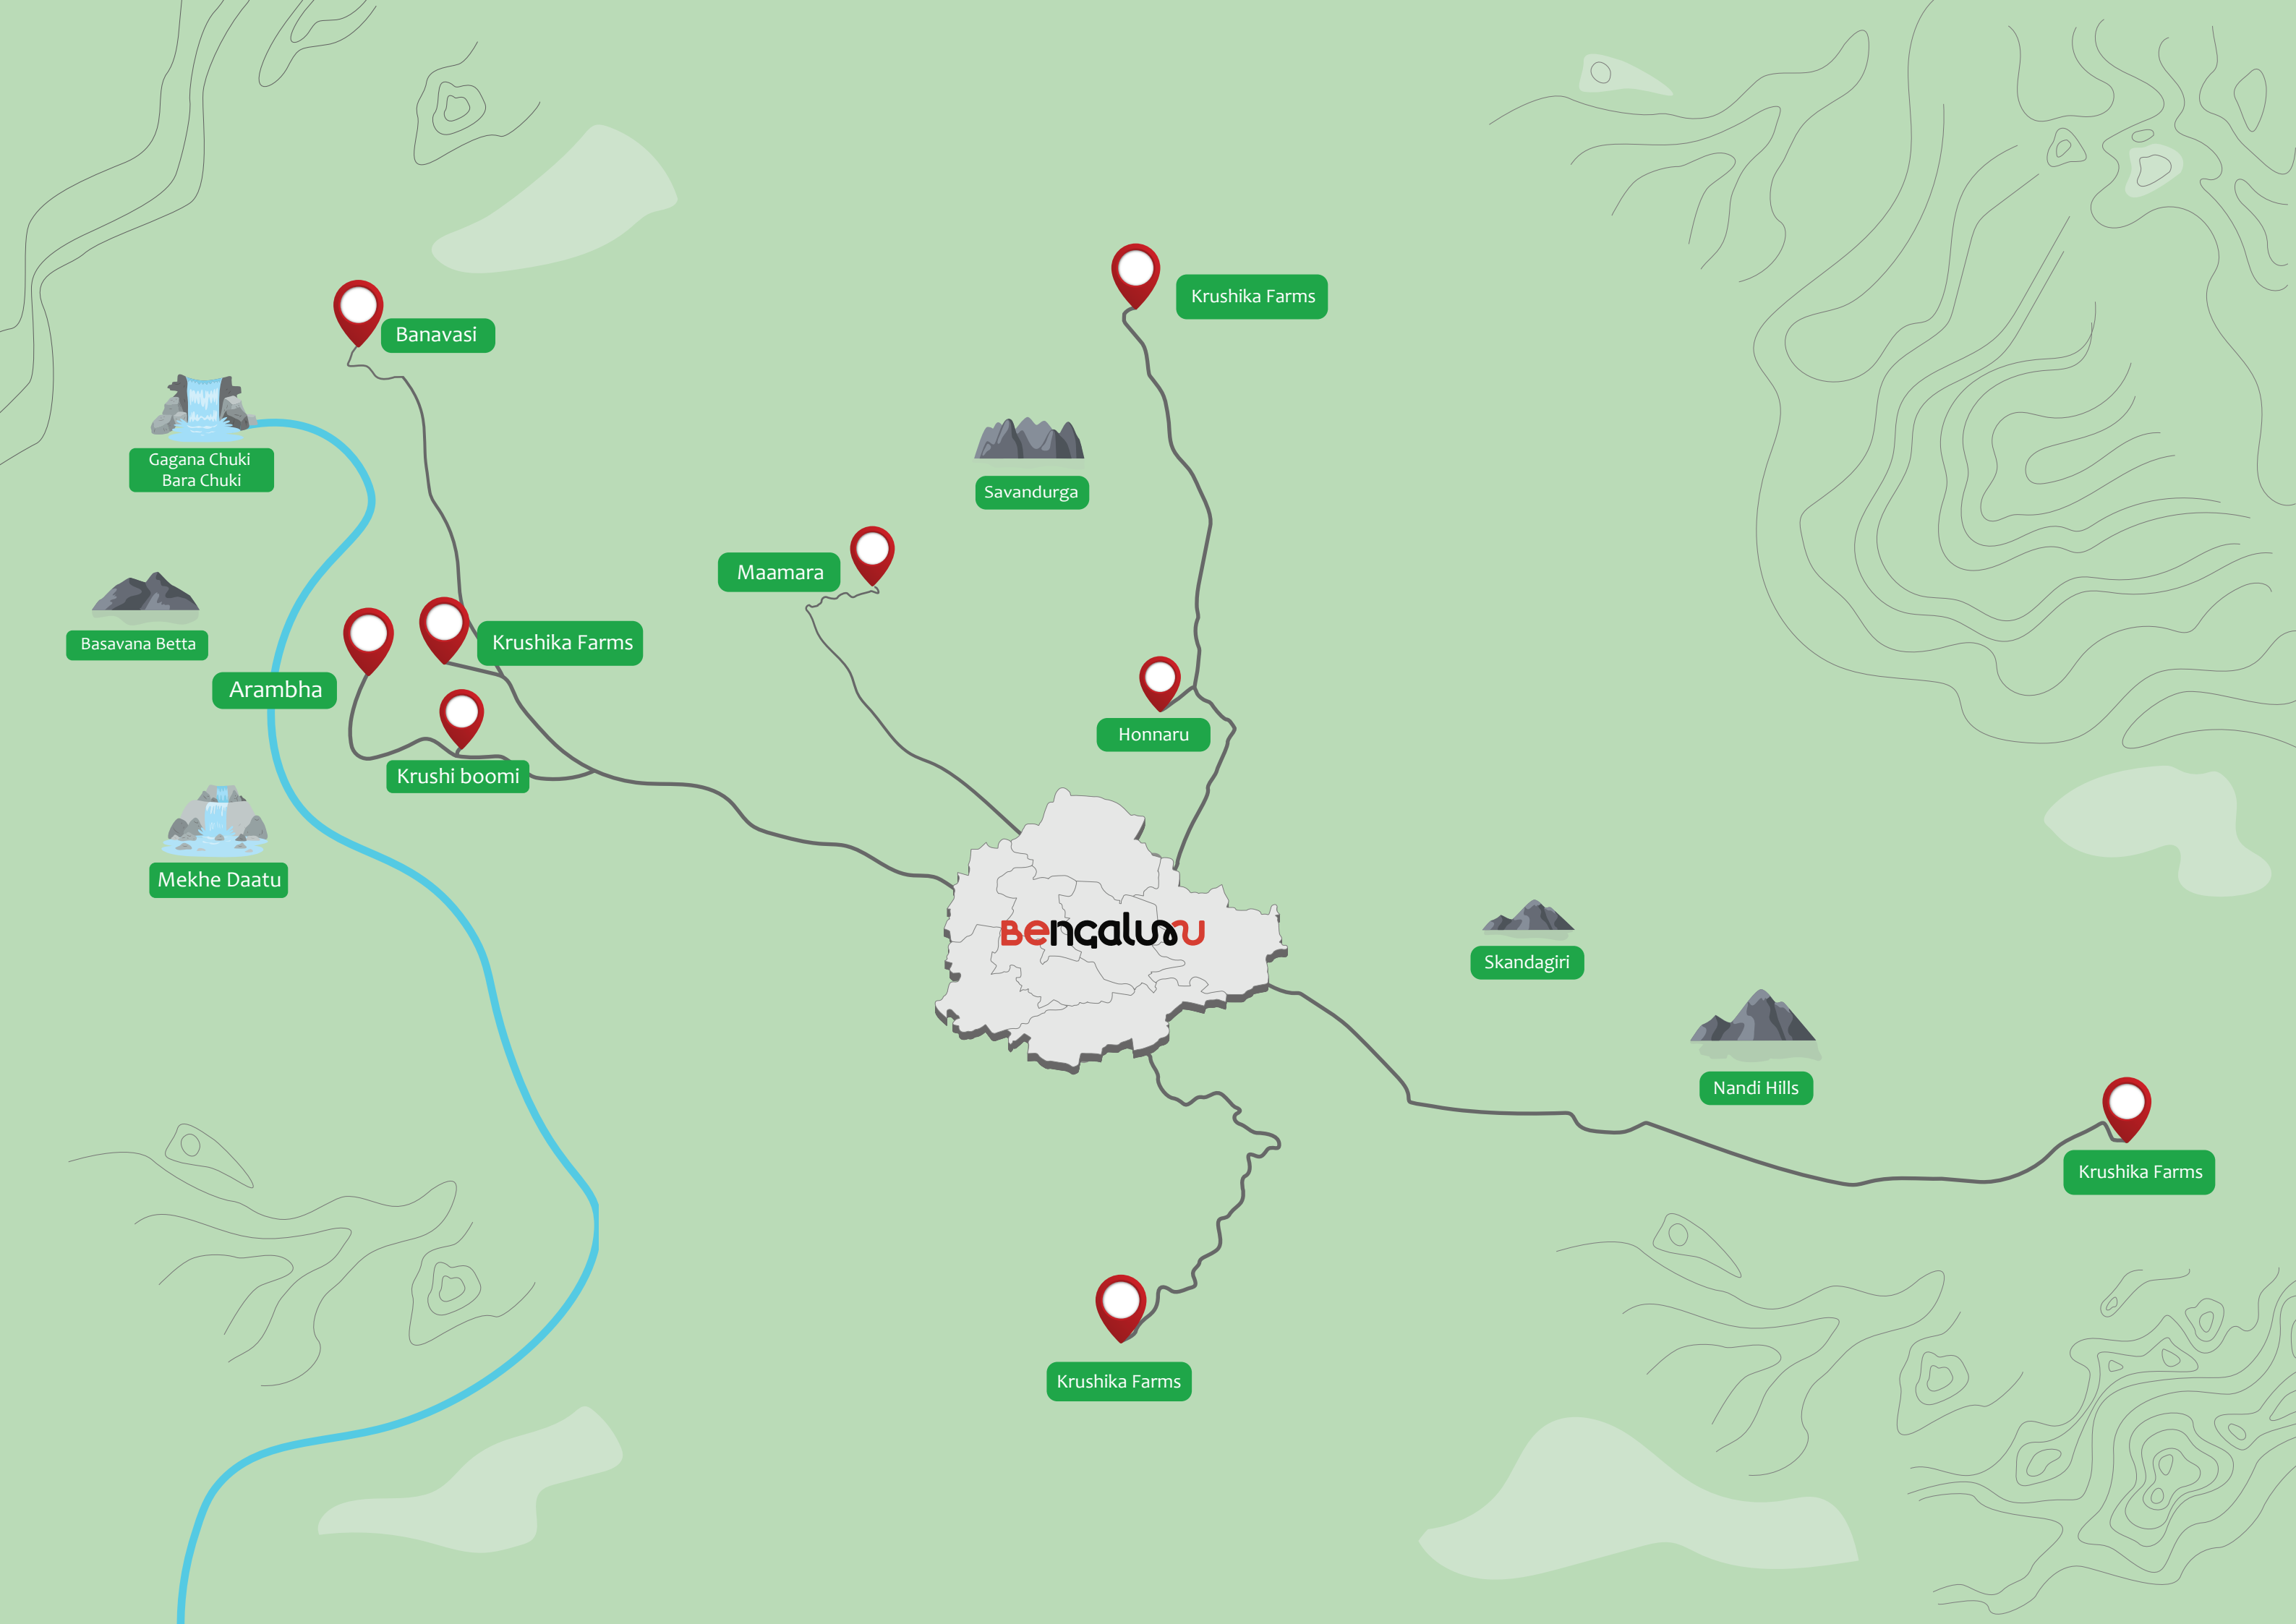

Free from the demands of the market and its toxic methods, agriculture at krushika is done solely to meet the nutritional needs of each family in the community. With the Krushika-care mobile application, we get insights about the health, consumption and food type of each family and cultivate accordingly.

Ethically and ecologically right

It is almost impossible to do anything with a full environment and ethical compliance these days. But if only there was a community to enable you to live a fully sustainable and ethical lifestyle!

THAT'S WHY!
